01 Retrieve and deduplicate
16,908 retrieved records
571 exact title-and-body duplicates
16,337 retained records
02 Screen retained records
5,322 main candidates
1,045 boundary records
9,970 reserve records
03 Assemble main corpus
912 specialized policy candidates
47 implementation/process records
4,363 broader measure-bearing records
04 Apply the same measurement to all 5,322 main candidates
Extract eldercare-related passages and apply the fixed 20-category dictionary to each fragment.
Record document-level hits; retain candidates with no extracted passage in the denominator.
Service profiles and trends
Full main corpus and broader subsets
Three-period and annual profiles
2011–2022 for the plotted trends
Figures 2 and 3
Focused period comparison
Broader candidates: 1,807 vs 1,404
2015–2018 vs 2019–2022
Raw and standardized rates; checks
Table 2 and Figure 4
Joint mentions and context
Same 3,211 broader candidates
Count shared and separate fragments
Read selected passages for context
